RE: Clean-Flo

Dear Mr. Kling,

I am writing to tell you how pleased we are at Parkview Hills that we selected Clean-Flo to help restore the 8 acre lake in our development.

Prior to the installation of the Clean-Flo System the lake was in tough shape – covered in weeds and algae and quite unsightly. We were facing the VERY expensive possibility of dredging the lake when we found your website.

We decided to consider Clean-Flo for our lake and worked with Lake Savers of Michigan to install the system and manage the process. We are very pleased with the results so far. In addition to installing the Clean-Flo System we also did a one-time herbicide treatment to knock back the milfoil in the lake and give the system “kick-start”.

We were planning additional herbicide treatments for 2007, but it wasn't necessary. The system significantly reduced the algae and weed growth in the lake and we are seeing clear evidence of muck reduction on the bottom.

We still have a long way to go to achieving our goals for the lake, but we are confident we are on the right track with the Clean-Flo System. We have been happy to recommend Clean-Flo and Lake Savers to other potential customers.

Sincerely,

**PARKVIEW HILLS MANAGEMENT COMPANY**
